

Please do not expand LPFM because it will take proirity over current FM translator service. I discovered K-Love radio when I was living in Boulder, CO, it literally changed my life. K-Love broadcasts exclusively positive, encouraging, uplifting music and programming. Main stream media focuses on the negative and sensational stories and music. It is invasive and often offensive.

I have friends across the county and we are all K-Love listeners. It keeps us connected with each other. K-Love is family programming. It is the one station the whole family can agree on.

K-Love programming is positive and encourages families to work together and to be of service in their communities. I listen all day at work. My co-workers often ask what station I am listening to and now my co-workers listen online at home and at work.

K-Love is listener supported. At every pledge drive there are stories of how K-Love has spoken to people when they were down, desperate, and ready to give up. Don't take away this original concept - Positive and Encouraging Radio to make room on the airways for something less.

Thank you,
